In this Readme file I'm going to explain how our Drawing app is working, and how wvery tool that we add is behaving; also I will explain the features,
that also we add to the previous tools of the app and the new buttons that we add.

1° The blur tool is one of the advanced tool that we actually we add to this
drawing app this app use pixel arrays and loops to can iterates over this pixel
arrays and their respective red,green and blue channels. The way that you can use this app is to select the tool from the tool box on the left side of the screen
and by mouse click or draging the mouse you can use this tool but to notice that this tool is
already working like for example drawing something in the canvas.

2° The EraserTool works like a rubber when you write something on the paper and you want to delete something
also you can change the size of the brush size by using the slider this make that the earse tool delete more begger area.

3° The floodtool is very usefull when you want to fill the shape you draw on the canvas in your
drawing app you can draw something with the pencil tool and fill it by using the floodfill tool
this tool can get the color of the color plate by clicking the color that we had.
also we can say this tool is considered as an advanced tool that also use pixel manipulation like the blur tool.

4° Also we make a change inide of the freehandtool that one of them is you can change the siuze of the pencil for drawing on the canvas.
you can draw the lines with small size or you can draw the line with bigger size on the canvas.
this feature is usefull when someone want to draw a tiny or bigger lines on the canvas.

5° The rect tool is used to draw a rect shape on the canvas this tool works by using the x and y cordinates of the mouse
and the size of the rect is decide by user till drag by mouse also you can change the color of the rect shape from the colors that we already have in the
color platte in general is a very easy tool to use if you want to use it with a friendly user interface.

6° The next tool that I would like to explain about it is the Spinograph tool
this tool is the 3rd advanced tool that we decide to add to our drawong app
this app require a lot of maths calculation that makes it a bit deficult but
is a very useful, tool for those are intreseted in the art this tool is very flexible
you can change the color of this tool by selecting the color that we have in our colorPlatte and the
lines that you draw can be tiny or bigger regarding to the size of the pensill tool
also you cna change the size o fthe shapes that you draw the spinograph tool by the

3 boxes on the below of the screen you can make change the radio of the small circle large circle and
also the diameter of this tool to draw the way that this tool work is by mouse click on the canvas.

7° About the Sparaycan tool we also add two features to this tool that is the size of the spray that can be decide by the slider and also the density of it
that also can be chose by the slider.

8° The next tool is the Stamp tool that you can use this tool by first selecting the tool and then
clik on the canvas also you can change the opacity or transprency and the size of the stamp tool by using the sliders that are provided for this tool.

9° The next tool that we decide to add is the startrail tool this tool works
by first clicking the tool on the toolbox that we had on the left side of the canvas
then you need to click on the canvas to see hoe the stars are drawn in the canvas on thing
that make this tool different than other tools is that we use a color picker for it
that means if you want to change the color of the stars you need to do it on the
color picker providid for this because otherwise will not detect the color from color platte.
Also we add a slider that let the use to change the size of the stars from most
smallest star to the largest star.

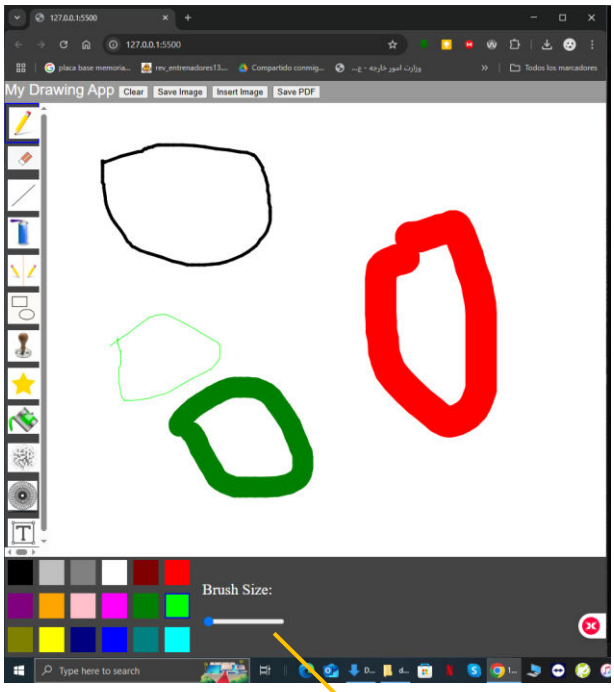
10° The last tool that we decide to add to our drawing app tool is the text tool
this tool let the user to can insert text on the screen and by the tick or the cross sgine can decide
if wants to keep the text on the canvas or undo it. also we includo a color picker for thios tool that help
the user to can change the color of the text final thing that we add for this tool is the
font size that could be change by using the slider for it.

The original app has just two buttons for save image and clear button
but we decide to add two more buttons to our app that is Insert Image that we
used it for insert an image on the screen from your pc, and also the save PDF
button that is used to save your jub as a pdf I have to mention that for this button we add
a external library called jsPDF that you can see it in the HTML file.

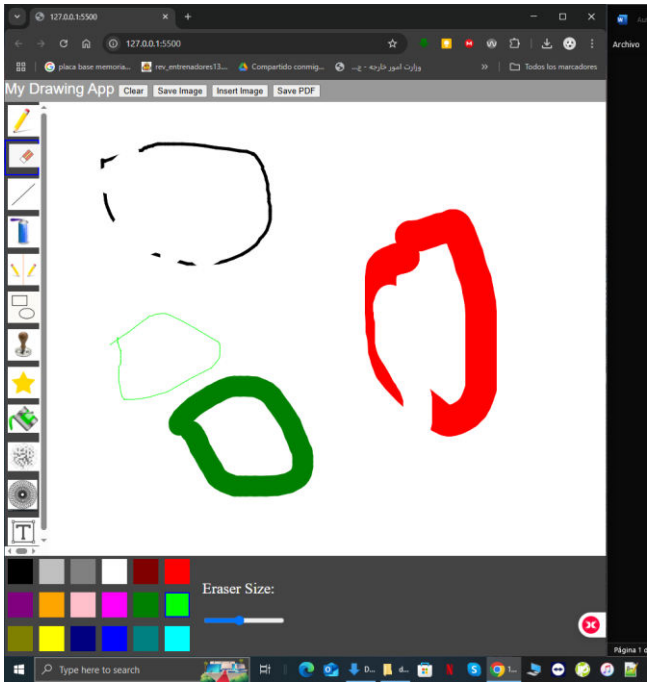
TO HELP YOU UNDRESTAND MORE HOW TO USE THIS APP AND IT´S TOOLS I MAKE
A WORD FILE CALLED Watchme. PLEASE LOOK AT THIS FILE AS WELL BECAUSE
COULD BE USEFULL.

NOTE: TO CAN SEE THE COLOR PICKER OR THE CHANGE SIZE FOR STAR TRAIL PLEASE IF YOU DONT SEE
THIS OPTIONS FIRST WHEN YOU CLICK ON THE START TRAIL TOOL CLICK FOR SECOUND TIME AND YOU WILL
SEE THE COLOR PICKER AND THE CHANGE SIZE SLIDER FOR THIS.

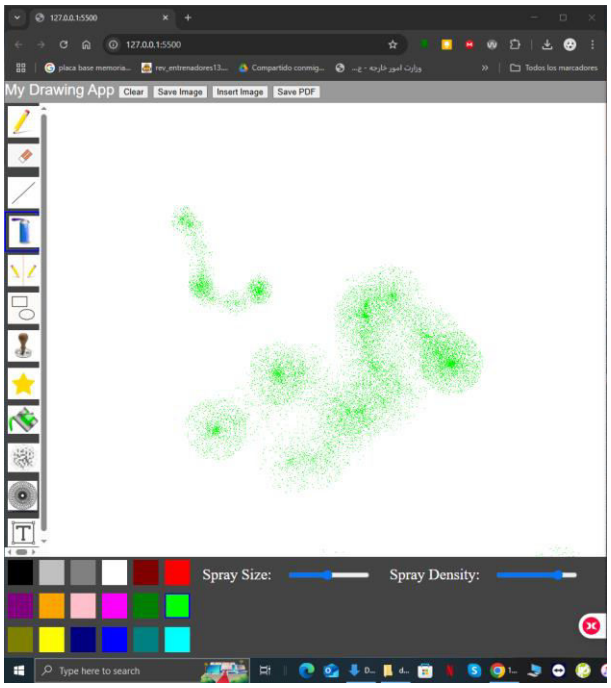
1º FreehandTool



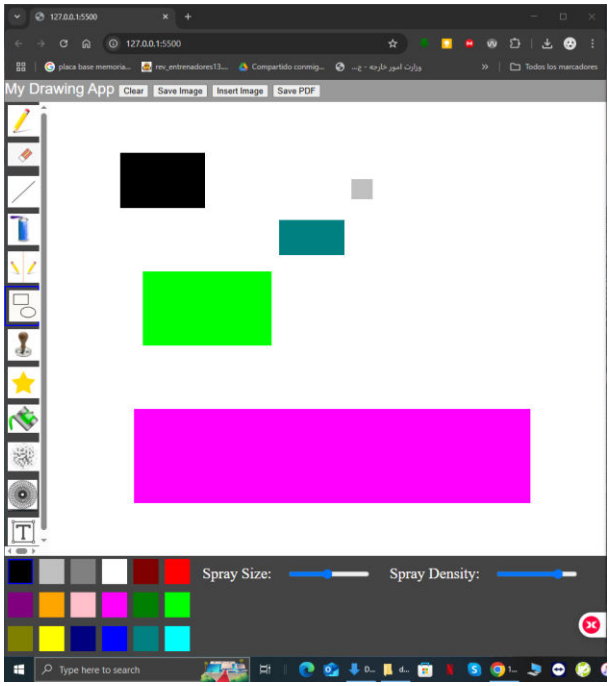
Freehandtool with the Brush size.



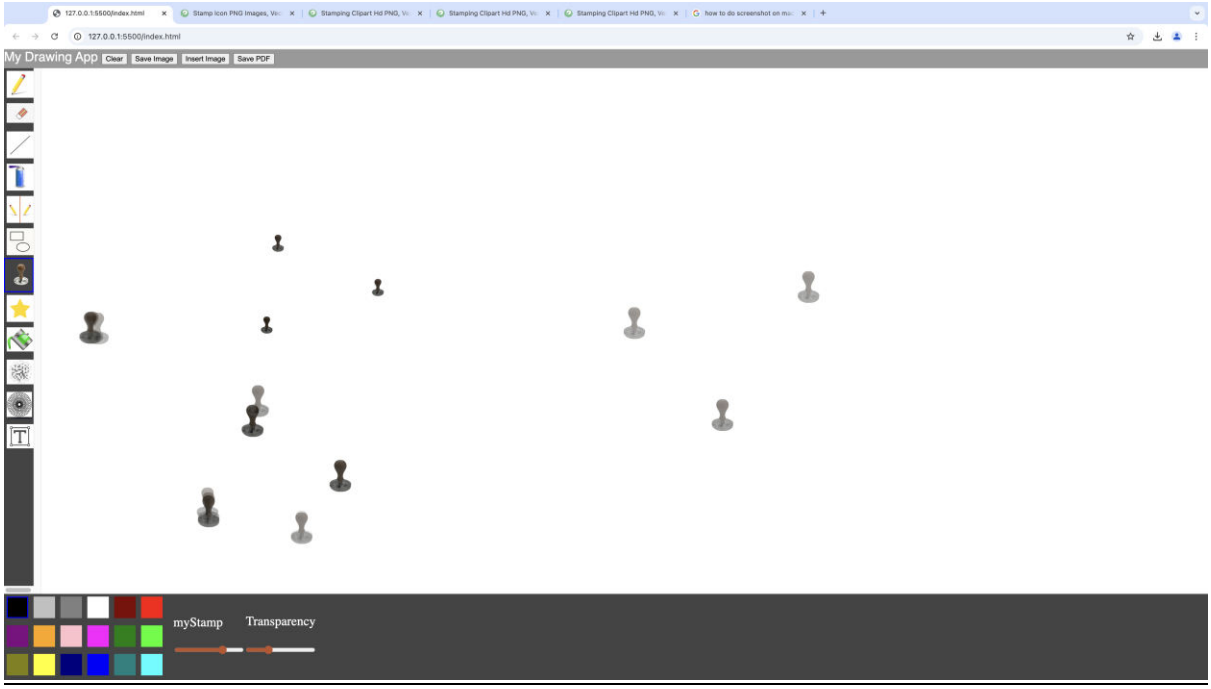
the earse tool with different size slider.



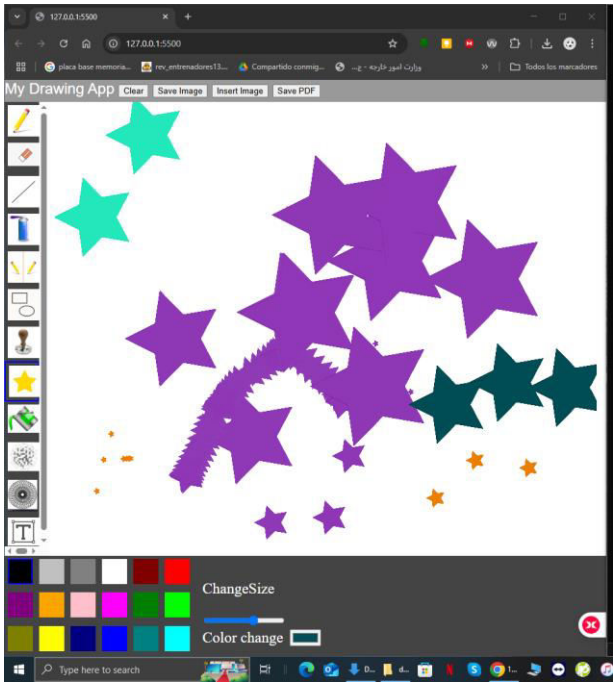
The spry can tool with size slider and density slider.



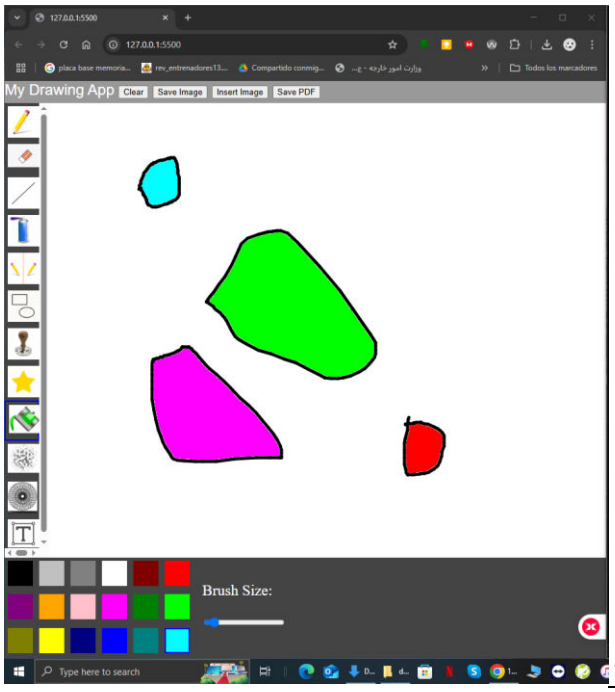
the rect tool to draw rect with different sizes.



The stamp tool with different size and opacity from the sliders.



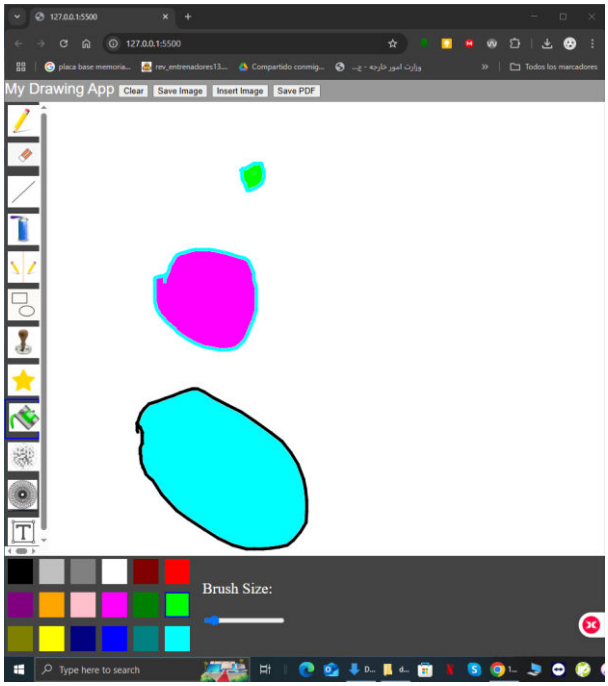
The star trail tool that can change the size from the size slider and change color from color picker.



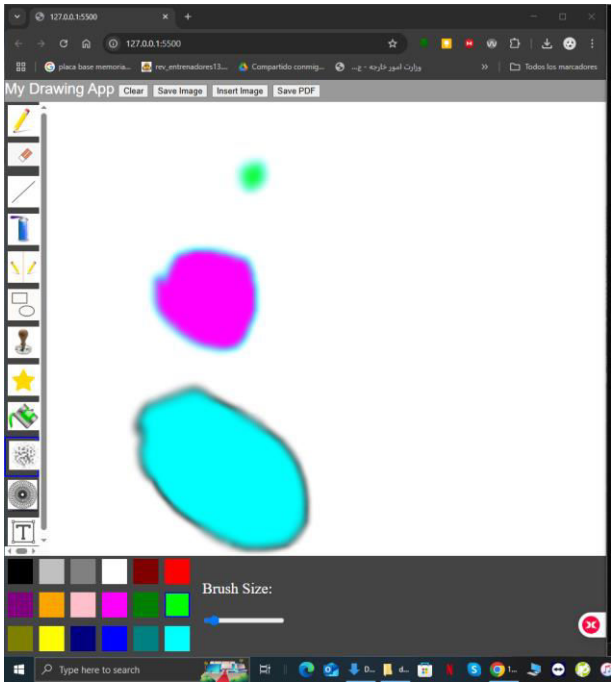
The fill tool here is used you have to select your color from the colorPlatte.

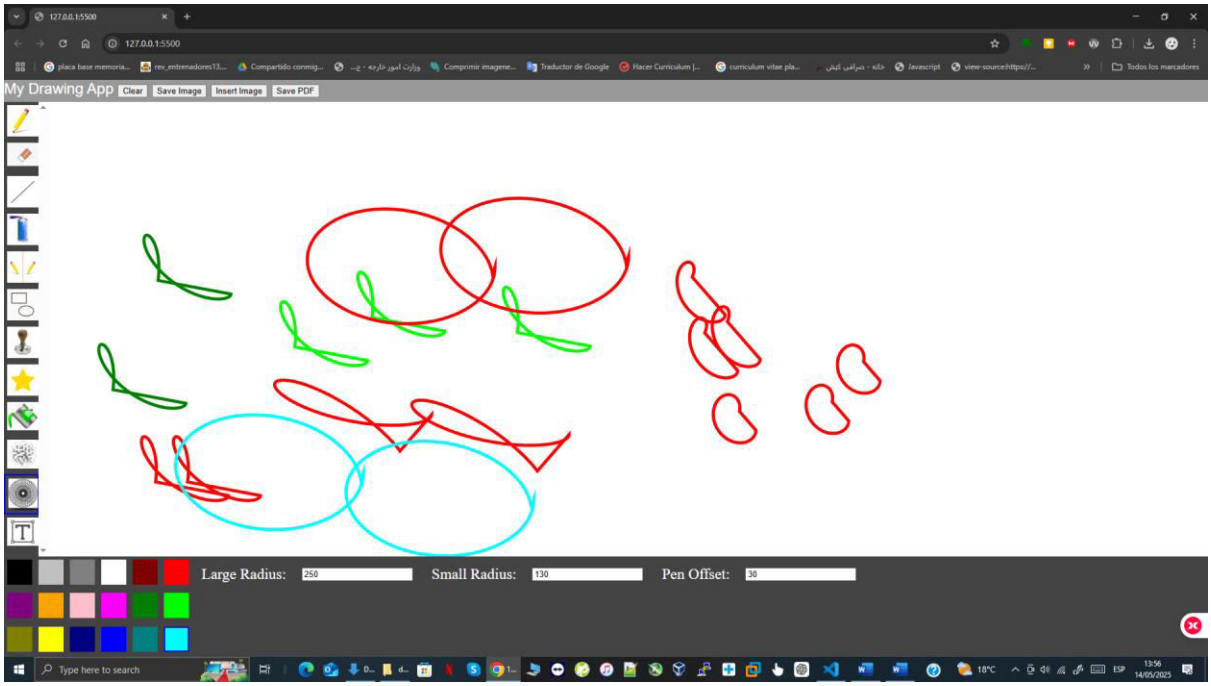
Blur tool is showing by before and after image:

Before using blur tool:

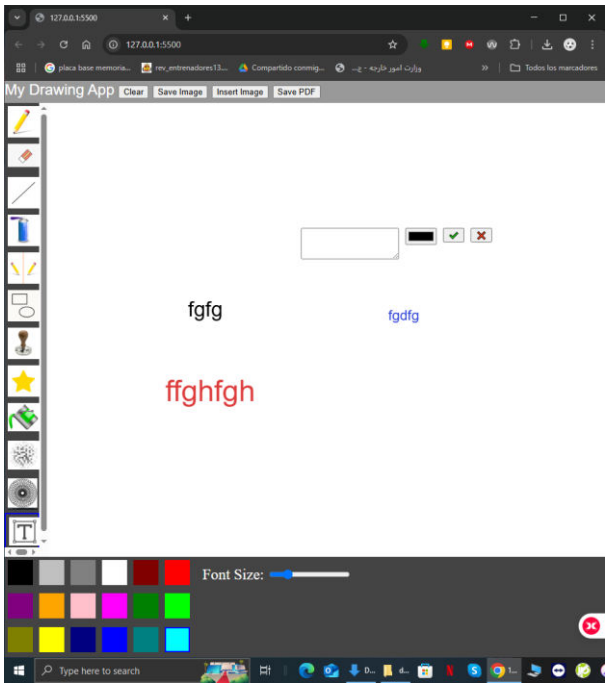


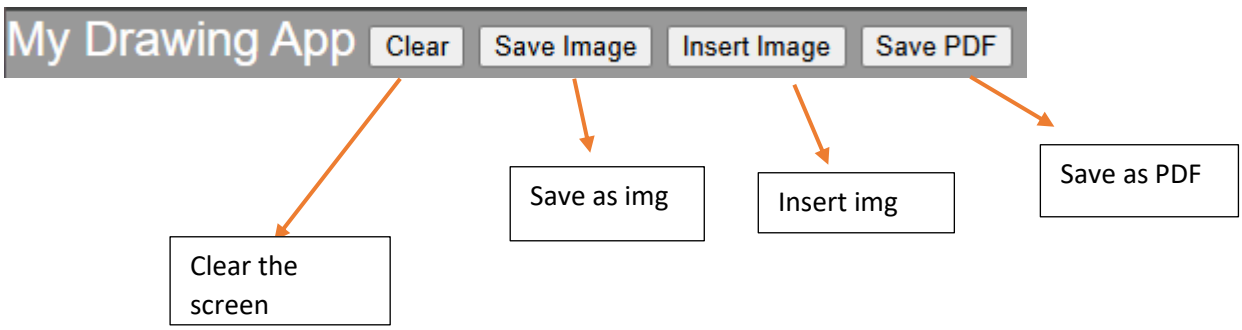
After using blur tool





Spinograhp tool with different sizes.





The text tool with different sizes and colors picked from color picker.
